S SERIES

STANDARD FOR HIDING ROLLER SHADES

DESIGNED TO DISAPPEAR

Blindspace® S Series is a concealment box made to hide roller shades with minimal visual impact. The box is installed during construction with the space accessible for shades installation when the room is completed.

It features the patented Blindspace® Safety Hinge that secures the cover in place and can be installed in any direction, allowing for side boxes to hide shade side channels or guide wires.

Popular in floor-to-ceiling windows and sliding doors, S Series can be installed to future-proof buildings to have the option for later installation of concealed shades.

Description

Concealment system to hide roller shades or to future-proof windows for installation of shades, with safety hinge that secures the cover in place.

Material & Finish

Aluminium, EN 6063 T6
Powder coated white RAL9016, 30% gloss
Powder coated to specific RAL colour
Raw aluminium

FEATURES

Seamless appearance after painting
Plaster is feathered over skim coat flanges to hide the box leaving only a thin hairline between the ceiling and the Blindspace® cover.

Cover painted to match window or ceiling
The cover can be provided in specific RAL colour or painted at site with primer and emulsion paint, to match window or ceiling.
Safety hinge securing the cover in place
The safety hinge can be installed on either side of the box and ensure that the cover is not falling to the floor if accidentally opened.
Cut to finished length, maximum 6m
Blindspace boxes and covers are supplied by manufacturer cut to finished length or in 3m or 6m lengths. Splice pins and plates are supplied to align multiple boxes and covers.
